

Melt Temperature Transducer/Transmitter

Model: WR-200-2 (Special for plastic machine)

Description

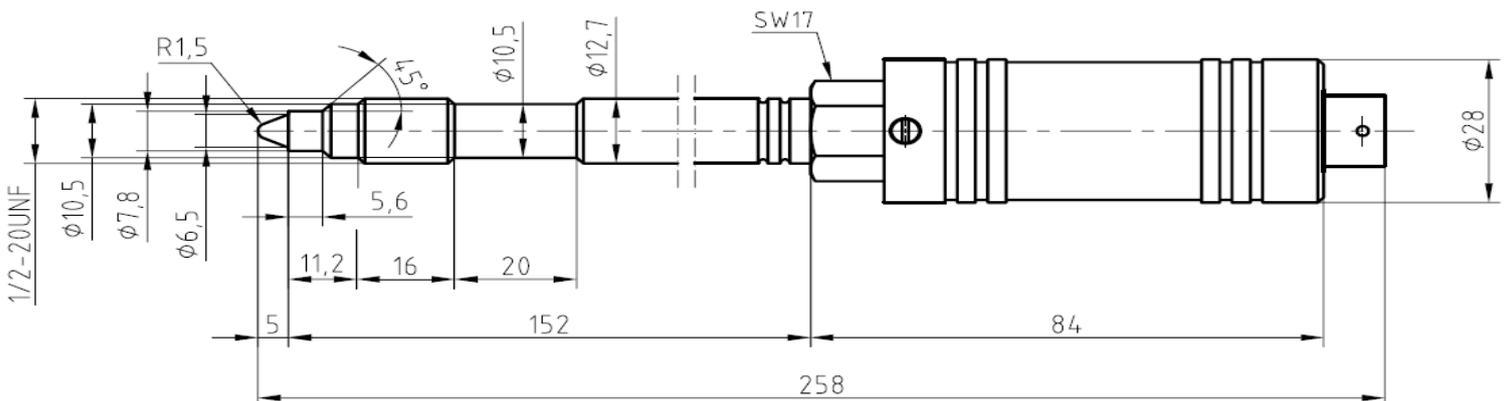

WR-200-2 Series temperature transducer/transmitter adopts excellent temperature sensing elements; consummate encapsulation technology and perfect assemble process to insure the quality and performance. This series has the advantage of fast thermal response time, strong thermal resistance capability, high pressure resistance, various temperature elements to choose, diversiform installation etc.

Feature

- ◆ Type J, K, E, PT100 optional
- ◆ 0 to 1300°C measurement range
- ◆ Immersion lengths to match applications
- ◆ Spring or armor adjustable

Dimensions

Specification

Temperature range: 0 to 1300°C
Output: 4-20mA optional
Power supply: 10~30VDC
Error: 0.5%FS
Media compatibility: 316L stainless steel
Process connection: 1/2-20UNF, M14*1.5
Insert length: 6inch, 9inch
Tip Length: 0mm, 5mm, 10mm, 15mm
Sensing element: J, K, E, PT100 temperature sensor
Electrical connector: 2PIN or 3PIN special connector
